

How to Register a New Club

If you're a brand new club that's never been registered to England Netball before, this guide explains what information we need to get you set up in ENgage.

Please send the following information to membership@englandnetball.co.uk:

1. The name of your club, as you would like it to be presented publicly
2. Your club's **Primary County** (this is where you will access the majority of membership services, including competition and development support)
3. Your club's address (this will be publicised on the England Netball **Club Finder**, so please state where you're most likely to train/ compete)
4. A contact telephone number for your club, if applicable
5. A contact email address for your club
6. Additionally, what committee role/s you will fulfill for the club
7. Your contact details

Once we have registered your club, we will be in touch with further information to help you allocate your remaining committee members and begin managing your club in our new netball management system, ENgage. More information about ENgage can be found [here](#).

In the meantime, please see [Club Matters](#), which will provide you with free, convenient and practical resources to help get your club started on an operational level.
